

Hey everyone!  
Don't be so dang  
trashy ... PLEASE  
RECYCLE!

- From May, 2011 through July 2017, GRIC residents have collected 1,987,020 pounds (993.51 Tons) of recyclable material. When a household recycles, trash can be reduced by 40 to 60 percent!
- Recycling has saved the Community \$64,578.15 in trash disposal fees.
- Recycling keeps material out of landfills. When a landfill reaches capacity and must be closed, it has to be monitored for 30 years to ensure no toxic chemicals contaminate groundwater
- The U.S. uses **25 BILLION** styrofoam cups per year. The cups leave synthetic material in a landfill forever.
- Every three months, Americans throw away enough aluminum to build our nation's entire commercial air fleet.

When you recycle, you respect future generations, your environment and your Community.
