INSTRUCTIONS
APPLICATION FOR NON-TITLE V AIR QUALITY PERMIT

Use this form to apply for a Non-Title V air quality permit or permit renewal for an entire facility. Do not use it to amend prior applications, add additional pieces of equipment to an existing permitted facility, or transfer a current air quality permit from one person to another. Separate application packages are available for those purposes.

The submitted application and documents become the property of the Gila River Indian Community (GRIC) DEQ and will not be returned. All submitted documents will be available to the public unless a notice of confidentiality has been submitted by the applicant and agreed upon by the Director in accordance with Part II, Section 10 of the GRIC Air Quality Management Plan (AQMP). If confidentiality is granted, a fully completed application with confidential information clearly identified along with a separate copy of the application for public review without the confidential information must be submitted.

Applications can be mailed to the **Department of Environmental Quality (DEQ)** at PO Box 2139, Sacaton, AZ 85147, submitted in-person at 168 Skill Center Rd., Sacaton, AZ 85147, or emailed to air@gric.nsn.us. A **$350.00** application fee must accompany the application. Payments can be made by check (made out to the Gila River Indian Community DEQ) and mailed or hand-delivered to the DEQ office or by credit card at the GRIC Cashier's office or over the phone (520-562-9621). If paying by credit card, please reference "**DEQ28**" and the facility/company name and submit the payment receipt along with the application. Before the permit is issued, the Permittee will be billed and must submit payment for all permit processing time required for billable permit actions, in excess of the application fee, at a rate adjusted annually under Part II, Section 11.8 of the AQMP. An annual administrative fee will also be charged per Part II, Section 11.3(B)(3).

An application fee is not required for a Tribal Entity. Part II, Section 1.0 of the AQMP defines a Tribal Entity as "a tribally owned and operated corporation, business or enterprise that provides funding to the Community Council resulting from profits from operating the entity where at least fifty (50) percent of the profits are shared with the Council for the benefit of Community members."

Complete items 1-20 and attach manufacturers' drawings and specifications when required by the permit application. If necessary, attach additional sheets to the application to provide all required information. Submit the application by completing the attached original forms. Consider future growth when determining the maximum throughputs and/or production rates. **All applicants must complete items 1 through 20 and Sections L and Z or the application will be deemed incomplete. Submit only the other sections that apply.**

The GRIC AQMP (air pollution control regulations) is available at the above address or may be viewed and/or downloaded from our web site at www.gricdeq.org. You may also contact the Department by telephone at (520) 562-2234 to obtain a hard copy or electronic copy of the GRIC AQMP.

If you need help completing the application package or to schedule a pre-application meeting with permitting staff, please see our website or contact the Air Quality Program Manager at air@gric.nsn.us / (520) 796-3781.

For all listings above which contain the word "compounds" and for glycol ethers, unless otherwise specified, these listings are defined as including any unique chemical substance that contains the named chemical as part of that chemical's infrastructure.

[1] X´CN where X = H´ or any other group where a formal dissociation may occur. For example KCN or $Ca(CN)_2$.

[2] Includes mono- and di- ethers of ethylene glycol, diethylene glycol and triethylene glycol $R(OCH_2CH_2)_n$-OR' where:

n = 1, 2 or 3

R = alkyl C7 or less, or phenyl or alkyl substituted phenyl

R´ = H, or alkyl C7 or less, or carboxylic acid ester, sulfate, phosphate, nitrate, or sulfonate.

[3] Includes mineral fiber emissions from facilities manufacturing or processing glass, rock or slag fibers or other mineral derived fibers of average diameter one (1) micrometer or less.

[4] Includes organic compounds with more than one (1) benzene ring and which have a boiling point greater than or equal to 100°C.

[5] A type of atom which spontaneously undergoes radioactive decay
